RAMPED Sales Training Manual & Program

A complete prospecting → closing → leadership training system, built on the frameworks taught by **30 Minutes to President's Club (30MPC)** — Armand Farrokh, Nick Cegelski, and their guests (Mark Kosoglow, Jason Bay, Sam McKenna, Charles Muhlbauer, Todd Caponi, Marcus Chan and others).

How to use this manual

Module	File	Who it's for
0. Program & calendar	`00-program.md`	Everyone — the 12-week program, daily/weekly rhythms, certifications
1. Prospecting	`01-prospecting.md`	SDRs, AEs — cold calling, email, LinkedIn/video, sequences, territory
2. Closing	`02-closing.md`	AEs — 5-stage process, discovery, demo, multithreading, business case, MAP, negotiation
3. Leadership	`03-leadership.md`	Managers — hiring, onboarding, coaching, pipeline reviews, forecasting
4. Templates & scorecards	`04-templates-and-scorecards.md`	Fill-in-the-blank tools, role-play scorecards, certification rubrics
Sources	`SOURCES.md`	Every episode/article the manual draws on, plus open gaps

Read this: what is 30MPC vs. what is ours

Every section is tagged so reps know what is proven doctrine and what we built on top of it:

- `30MPC` — the principle, framework, or stat comes from 30MPC show notes, episodes, or their partner guides (source listed in `SOURCES.md`). Short quotes are show-note wording.
- `RAMPED` — our own talk track, template, or program design built on 30MPC structure. Edit these freely for our ICP, product, and personas.

> **Research note.** This version was built from public 30MPC episode show notes, partner guides (Gong, Orum, Outreach, WINN.AI), and summaries. `30mpc.com` itself — including the gated templates (stage template, MAP template, Big Demo Deck, 18-objection guide, cold-email template pack) — was not reachable from the build environment. See "Open gaps" in `SOURCES.md` for what to pull in when someone with access downloads those assets.

The one-page version

Prospecting

1. Research in blocks, dial in blocks — research first, then ~40 dials in 60 minutes.

2. Open with context: *"heard the name tossed around?"* or a permission opener that owns the cold call.
3. Pitch the **problem**, not the product. One-sentence differentiator. Ask an interest question.
4. Handle every objection with **Mr. Miyagi**: don't fight it → acknowledge → clarify → wax back to the pitch.
5. Sequences: start with email, ~10 touches over ~30 days, one pain per email, voicemails point to email.
6. Emails under 125 words, interest-based CTA, no calendar links in cold email, "show me you know me."

Closing

1. Stages are **buyer agreements**, not meetings: Problem → Priority/Solution → Power/Evaluation → Value/Commercial → Vendor approval.
2. Every call: PPO agenda (Purpose, Plan, Outcome) → discovery → **5-Minute Drill** (do you want to buy / when / how).
3. Discovery Tree: situation → operational problem → executive impact. Humbling disclaimers + "to what extent…".
4. Get to power before you negotiate. Build the business case *with* your champion.
5. Customer-facing close plan reviewed live on every call (power, security, legal gates).
6. Negotiate: explain how price works, give it, stop talking. Flinch & trade — never give without a get.

Leadership

1. Hire only on an *enthusiastic yes*; each interview stage tests one skill; re-run the mock to test coachability.
2. Onboard hard for the first 30 days ("win the first 30 days or lose the next 300").
3. Coach from metrics → pick the calls; prep 30 minutes before every 1:1.
4. Lightning pipeline reviews: binary yes/no criteria + weekly rep-written pipeline trackers.
5. Put prospecting into calendar-invite operating rhythms. Role-play every critical conversation.

Module 0 — The RAMPED Training Program

> A 12-week ramp: an intensive 4-week bootcamp, then 8 weeks of supervised selling with certifications. After that, veterans move into an ongoing weekly skill program. Structure is **RAMPED**. It is built on these **30MPC** principles: 4-week calendar mixing industry, product and execution · ~6 weeks of heavy immersion · Marcus Chan's 12-week ramp · "win the first 30 days" · training leads · a buddy who sat on the interview panel.

Program at a glance

Phase	Weeks	Goal	Gate to move on
Bootcamp	1–4	Learn the frameworks; prove them in role plays	Certifications C1–C3
Supervised selling	5–8	Live prospecting and discovery with coaching	C4 + first meetings booked
Full ownership	9–12	Full book, full cycle	C5–C6 + ramp targets
Continuous	13+	Keep veterans sharp	Quarterly recertification

Every new hire gets these before day 1:

- A **buddy**: a peer who sat on their interview panel.
- A **personal success blueprint**: their goals, income target, and what President's Club means to them.
- A **road-to-President's-Club** tracker.

Weeks 1–4: Bootcamp

Daily shape:

- AM: learn
- Midday: drill
- PM: apply

Each Friday ends with a certification or showcase.

Week 1: Foundations (industry, ICP, product, the opener)

Day	AM: learn	Midday: drill	PM: apply
Mon	Welcome, success blueprint, tools setup	—	Shadow 2 calls with buddy
Tue	Industry and buyer: our ICP, personas, the problems we solve	Build the Messaging Matrix for persona 1 (template)	Listen to 5 recorded winning calls

Day	AM: learn	Midday: drill	PM: apply
Wed	Product: the 3 problems → 3 workflows	Build the Messaging Matrix for personas 2–3	Shadow a demo
Thu	Module 1 §1.2: openers and the problem proposition	20 role-play openers with buddy	Write your pitch for each persona
Fri	**C1: Pitch certification**: deliver opener + pitch for 3 personas to manager	—	Week 1 retro

Week 2: Prospecting execution

Day	AM: learn	Midday: drill	PM: apply
Mon	Mr. Miyagi objection handling	Objection gauntlet: 6 objections × 3 rounds	Research block: 40 accounts
Tue	Cold email (§1.3)	Write 4 emails for the sequence; peer review	Load first sequence (Tier 2 accounts)
Wed	Sequences, LinkedIn, video	Record 3 practice videos	**First live dial block** (40 dials, manager listening)
Thu	Territory plan (§1.7)	Tier your book 1/2/3	Dial block + call review
Fri	**C2: Cold call certification**: live role play with a surprise objection; a second attempt is allowed after feedback	—	Week 2 retro

Week 3: Discovery and the sales process

Day	AM: learn	Midday: drill	PM: apply
Mon	5-stage process and exit criteria (§2.1)	Stage-quiz real deals from the CRM	Dial block
Tue	PPO agenda + Discovery Tree	Build a tree per persona	Shadow a top AE's discovery
Wed	Muhlbauer questioning + 5-Minute Drill	**SMB discovery loops**: 5 back-to-back 15-min mock discoveries with different buyers	Dial block
Thu	Demo flow and reverse demo	Mock demo to buddy	Run first live discovery on a **training lead** (manager on the call)
Fri	**C3: Discovery certification** (rubric in 04)	—	Week 3 retro

Week 4: Late stage + showcase

Day	AM: learn	Midday: drill	PM: apply
Mon	Multithreading and champions	Stakeholder-map a live deal	Dial block

Day	AM: learn	Midday: drill	PM: apply
Tue	Business case + close plan	Write a one-page business case for a mock deal	Dial block
Wed	Negotiation (§2.9)	Discount role plays: flinch & trade	Live discovery (solo, recorded)
Thu	Forecasting and CRM hygiene	Lightning-review your own pipeline	Dial block
Fri	**Showcase week finale**: full-cycle mock deal (discovery → demo → negotiation) in front of the team	—	30-day review with manager

---

Weeks 5–8: Supervised selling

- **Daily:** 2 dial blocks (power hours). Sequences run on the full Tier 2–3 book.
- **Weekly:**
  - Manager reviews 3 calls a week, chosen from the metrics.
  - The rep runs 2+ discoveries with the manager listening or reviewing the recording.
- **Training leads:** low-stakes inbound only. No strategic inbound until certification C4.
- **C4: Live call certification (end of week 6).** Two recorded live calls pass the rubric: one cold call and one discovery.
- **Targets:** first meetings booked by week 5; 4+ meetings/week (SDR) or first S2 opportunities (AE) by week 8.

Weeks 9–12: Full ownership

- Full book, including Tier 1. Tier 1 accounts get "show me you know me" videos and multithreaded plans.
- AE: run full cycles. Close plans are reviewed live with the buyer.
- **C5: Deal review certification.** Present 2 live deals using the Deal Review template.
- **C6: Negotiation certification.** Live role play against the manager playing procurement.
- **Week 12:** 90-day review. Graduate to the full quota, or extend the ramp with a written plan.

Week 13+: Continuous program (veterans)

Runs on the weekly rhythms in Module 3 §3.6: skill lab, game film, deal clinic, wins and losses.

RAMPED Skill lab rotation (repeats every quarter):

Week	Skill	Week	Skill
1	Openers	7	Demo / reverse demo
2	Problem proposition	8	Multithreading / getting to power
3	Objections (dismissive)	9	Business case
4	Objections (situational / incumbent)	10	Close plans

Week	Skill	Week	Skill
5	Cold email teardown	11	Negotiation
6	Discovery tree + 5-Minute Drill	12	Territory plan for next quarter

Quarterly **recertification**: every rep re-runs C2 and C3. Anyone scoring below 3 on any line gets a 2-week focus plan.

Certification summary

#	Certification	When	Pass bar
C1	Pitch (3 personas)	Week 1	All rubric lines ≥ 3
C2	Cold call role play	Week 2	≥ 3 on every line; improvement on second attempt
C3	Discovery role play	Week 3	≥ 3 on every line, including the 5-Minute Drill
—	Showcase (full cycle)	Week 4	Team feedback; no gate
C4	Live calls	Week 6	2 recorded live calls pass
C5	Deal review	Week 10	2 deals pass the lightning review with ≤ 1 "no"
C6	Negotiation	Week 11	No concession without a "get"; price delivered cleanly

Rubrics: `04-templates-and-scorecards.md`.

Ramp metrics to track

Week	SDR	AE
4	Certified C1–C3; 100+ dials	Certified C1–C3
8	4+ meetings/week	3+ S2 opportunities
12	100% of meeting quota	Pipeline at 3× quarterly quota; first close (cycle permitting)

Module 1 — Prospecting

> Goal: book qualified first meetings consistently across phone, email, LinkedIn, and video. Tags: 30MPC = sourced doctrine · RAMPED = our build on top of it.

1.1 Mindset and math

- 30MPC's flagship claim: their cold-call script books **1 meeting out of every 3 connects** (#489, #540). Jason Bay on 30MPC: the best callers he's seen hit ~1 in 3 connects *because they call people they already know are a good fit and did research first*. The average positive-outcome rate is closer to ~1%.
- 30MPC Objections are where the call starts: *"once you get past the first 30–45 seconds, objections are where the call really begins"* (30MPC × Orum guide).
- 30MPC First objections are usually a reflex to being interrupted, not a reaction to your pitch (*Cold Calling Sucks* book notes).

RAMPED **RAMPED activity targets (starting point; calibrate after 30 days of data)**

Metric	SDR	AE (self-sourced)
Dial blocks / day	2 × 60 min	1 × 60 min
Dials / block	~40	~40
New accounts researched / week	50	20
Active sequenced prospects	150–250	50–100
Meetings booked / week	4–6	2–3

1.2 The cold call: Opener → Pitch → Objections

30MPC The 30MPC call has three parts: **the opener, the pitch (a "problem proposition"), and objection handling** using the **Mr. Miyagi** framework. The goal is to sell the meeting, not the product.

Prep: research in blocks, dial in blocks

- 30MPC *"Get all your research done before, 40 dials over 60 minutes"* (Playbook 1).
- 30MPC Cap prep at ~2 minutes per prospect to find a single hook (Morgan Ingram, Club Playbook #173).
- RAMPED For each call block, prep a list of 40 with these columns: Name · Title · Persona · Hook (one line) · Peer logos to mention · Problem you'll lead with.

Openers

30MPC **Opener A, "Heard the name tossed around".** Ranked #1 of the openers tested in Gong's 300M-call study written by Armand: ~11.2% success. It works because it makes a cold call feel like a warm intro. Lead with peers or competitors you work with, then ask assumptively.

RAMPED talk track:

> "Hey {First}, it's {Me} from RAMPED — we work with {Peer 1} and {Peer 2}. Have you heard our name tossed around?"
>
> *(Either answer:)* "No worries — quick context, then you can tell me if it's relevant..." → Pitch.

30MPC **Opener B, the permission-based opener.** About 11.2% success. It works because it *"owns that you're making a cold call and disarms the prospect with brutal honesty."* Three steps:

1. Lead with context.
2. Own the cold call.
3. Get permission to pitch.

RAMPED talk track:

> "Hey {First}, {Me} from RAMPED. I saw {hook — e.g., you're hiring three {role}s}. Full honesty, this is a cold call — can I take 30 seconds to tell you why I called, and you can tell me if it's worth keeping talking?"

30MPC **Openers to stop using**

- *"Did I catch you at a bad time?"* performs roughly 40% worse than baseline.
- *"Could I get 30 seconds to tell you why I called?"* used on its own, with no context, sounds like every telemarketer.

30MPC **Tone.** A warm voice is hard to hang up on (Jason Bay). Morgan Ingram: thank them for picking up, then use a pattern interrupt along the lines of "we don't know each other — here's why I'm calling."

30MPC **Be disarmingly blunt.** If they ask how you got their number: *"On the internet"* or *"In a database."* Don't dodge it.

Pitch: the problem proposition

30MPC Rules:

- Spend most of the pitch on the **problem**, described vividly.
- Give the differentiator in **one sentence**.
- Don't put yourself in a product category.
- No buzzwords.
- The aim is to create curiosity, not to trigger objections.

RAMPED pitch template:

> "I work with {persona} at {peer-type companies}. They usually tell me one of two things: either {problem 1, vivid, in their words} — or {problem 2, vivid}. We {one-sentence differentiator}. Are either of those on your radar?"

RAMPED Fill one of these in for every persona in the Messaging Matrix (§1.5). Ban these words from the pitch: *platform, solution, leverage, streamline, best-in-class, AI-powered.*

Close for the meeting

- 30MPC Use an interest-based CTA, not a big ask.
- 30MPC When the fit is clear, be assumptive and roll straight into scheduling (Jason Bay).
- 30MPC Suggest specific times, or send a placeholder invite while you're still on the phone (Playbook 12).

RAMPED Example:

> "Sounds like {problem} is real for you. Worth 30 minutes to see how {peer} handled it? I've got Tuesday at 10 or Wednesday at 2 — I'll send a placeholder now and you can move it."

Objections: the Mr. Miyagi framework

30MPC Use one framework for every objection. Never fight it; flow with it.

Step	What you do
0. Pause	Wait ~1 second so they finish (Morgan Ingram script)
1. Acknowledge	Agree with the feeling, not the conclusion
2. Clarify	Ask a question that surfaces the *real* reason
3. Wax on / wax off	Return to the problem proposition, now tailored

- 30MPC **"Not interested" is a brush-off.** Stop at the acknowledge step, let the real objection come out, then run the framework on that.
- 30MPC **Three objection types.** Gong's data via 30MPC puts them at:
  - Dismissive, ~50% (e.g., "not interested", "send me an email")
  - Situational, ~43% (e.g., "no budget", "call me in 6 months")
  - Existing solution, ~8% (e.g., "we use X")
- 30MPC The 30MPC × Orum guide covers the five objections below. 30MPC also publishes an "18 cold call objections" guide (see Sources).

RAMPED **RAMPED talk tracks.** These are our wording, built on the Miyagi steps.

Objection	Acknowledge	Clarify	Wax back
Not interested	"Totally fair — you didn't wake up hoping I'd call."	"Out of curiosity, is it that {problem} isn't a thing for you, or just bad timing?"	Re-run the pitch on whichever they pick

Objection	Acknowledge	Clarify	Wax back
Send me an email	"Happy to."	"So I don't send you a novel — which was closer, {problem 1} or {problem 2}?"	"Got it. Most {persona}s want to see how {peer} fixed that — let's put 20 min on the calendar and I'll send the email as the agenda."
No budget	"Makes sense — nobody has budget for something they haven't seen yet."	"Is it that nothing's allocated this year, or that {problem} isn't a priority right now?"	"If {problem} is costing {impact}, worth 20 min to see if it pays for itself before planning season?"
Call me in 6 months	"Can do."	"What changes in 6 months — new budget, a project wrapping, something else?"	"Let's do 15 min now so you've got the info when that hits, and I'll put the 6-month follow-up on the calendar too."
We already use {X}	"Good — {X} is solid, and a lot of our customers came from {X}."	"If you could wave a wand and change one thing about it, what would it be?"	Tie their answer to the differentiator → ask for the meeting
How'd you get my number?	—	"On the internet." *(smile)*	Back to the pitch

Gatekeepers and voicemail

- 30MPC Gatekeepers: #497 teaches three tactics for getting past any gatekeeper *"without lying, pitching, or wasting time."*
- RAMPED Our default with a gatekeeper:
  - Be brief, confident, and use first names: "Hey, it's {Me} for {First}."
  - If they ask "what's it regarding?", say: "It's about {problem area} — {First} will know if it's relevant."
  - Never fake familiarity.
- 30MPC Voicemail: use a *"one-two punch of voicemails that lead with context and then point the prospect to email"* (Playbook 12). Make voicemails and emails reference each other (Kyle Coleman). Keep them short.
- RAMPED Voicemail script (under 20 seconds, never ask for a callback):

> "{First}, {Me} at RAMPED. Calling because {peer} was dealing with {problem}. I'm sending you an email with the subject '{subject}' — take a look there. Thanks."

1.3 Cold email

Principles

- 30MPC One pain point per email; don't sell everything (Playbook 7).
- 30MPC Under 125 words. If you have to scroll more than once, fix it (Kyle Coleman).
- 30MPC Subject lines:

    - 1–3 words (Anthony Natoli), or
    - Sam McKenna's style: *"a super funky subject line that makes absolutely no sense except to the person that's receiving it."*
- 30MPC **No calendar links** in cold outbound emails (Sam McKenna, #596).
- 30MPC Use an **interest-based CTA** on first touches ("Open to learning more?"). It beats a meeting ask in Gong's data. Switch to specific times once they're in a deal. No ROI claims in a cold email.
- 30MPC "Show Me You Know Me" (#samsales): open with the research, not a generic check-in. Pre-empt the likely objection inside the email. Move from rapport into the pitch.
- 30MPC Write like a text to a friend; formality isn't the same thing as professionalism.
- 30MPC The 5×5×5 research habit: 5 minutes of research → 5 insights → write it in 5 minutes.

RAMPED email templates

Email 1: Show Me You Know Me + Problem

```
Subject: {2–3 words only they'd get, e.g. "Austin SOC hires"}

{First} — {specific observation: their post / hire / initiative / news} caught my eye.

Usually when {persona}s are {doing that}, {problem in their words} shows up fast —
{one concrete symptom}.

{Peer} was in the same spot; we {one-line outcome}.

Worth a look, or not a priority right now?

{Me}
```

Email 2: Second pain (new thread)

```
Subject: {problem 2 in 2 words}

{First} — different angle. Most {persona}s I talk to at {peer-type} say {problem 2}.
{One sentence on why it's costly}. We {differentiator}.

Is that on your radar this quarter?
```

Email 3: Peer proof

```
Subject: {peer name}

{First} — {peer}'s {title} was dealing with {problem}. In {timeframe} they {result}.
Happy to share what they changed, even if we never work together. Interested?
```

Breakup email

```
Subject: closing the loop

{First} — haven't heard back, so I'll assume {problem} isn't a priority right now.
If that changes, reply "later" and I'll check back next quarter. Either way, appreciate you.
```

Personalization at scale

- 30MPC Personalize by persona first, then add one trigger. Jason Bay's order: Messaging Matrix → real personalization trigger → write → tighten → create variations.
- 30MPC AI can draft from detailed inputs, then a human edits for the personal touch. AI-written emails that named specific employees still read as human.
- RAMPED Personalization tiers:

Tier	Accounts	Personalization
1 — Top 10% of ICP	~25	Full "show me you know me": custom first line + custom video
2 — Strong fit	~100	Persona template + one trigger line
3 — Fit	Rest	Persona template only

1.4 The outbound sequence

30MPC Verified rules:

- Start with an email, then **~10 touches over ~30 days**, mixing calls and emails (Playbook 7).
- Open with a 3-touch cluster: personalized email + call + LinkedIn connect (Anthony Natoli).
- Keep it to about 3 sequences for your main personas plus 1 low-priority one; not 3,000 sequences (Sam Nelson).
- Once a meeting is accepted, stop selling and don't send a confirmation pitch.
- Build a separate event sequence for trade shows ("Open to stopping by the booth?").

RAMPED RAMPED Core Persona Sequence (10 touches / 30 days)

Day	Touch	Content
1	Email 1 + Call (VM 1) + LinkedIn connect (blank or one line)	Pain A, Show-Me-You-Know-Me
3	Call (VM 2 → "check my email")	Reference Email 1
5	Email 2 (new thread)	Pain B
8	Call	No VM
10	LinkedIn: engage with their post or send a <45s video	Video formula below
14	Email 3	Peer proof
17	Call + VM	Reference Email 3
21	Email 4	Pain C or a useful insight (no ask)
25	Call	—
30	Breakup email	"Reply 'later'"

RAMPED After day 30:

- Recycle the prospect into a quarterly nurture.
- Before re-engaging, redo the research. Don't re-send the same sequence (Natoli).

1.5 Messaging Matrix (build this before writing anything)

30MPC Jason Bay's matrix: for each persona, map **Priorities → Current solutions → Problems → Aspirations**.

RAMPED Fill one out per persona (template in `04-templates-and-scorecards.md`).

- Every pitch, email, and voicemail pulls from this matrix.
- Plan **3 problem statements per persona**, and use **one per touch** (Natoli).

1.6 LinkedIn, video, and other channels

- 30MPC Don't treat LinkedIn like email. Use connects, engage with their content, and use DMs strategically (Playbook 11). Blank connection requests are fine.
- 30MPC Prospecting video formula: **under 45 seconds → who you are, why you're reaching out, value + CTA** (#531). Send a confirmation video on the day of the meeting to cut no-shows.
- 30MPC Use offline touches for Tier 1 accounts, e.g. gifts tied to an occasion. *"Be everywhere — social, email, phone call, and mail."*
- RAMPED Video script (about 40 seconds):
  - Hold up a whiteboard with their name, or screen-share their website.
  - "Hi {First}, {Me} from RAMPED. Recorded this because {trigger}. {Peer}s usually hit {problem} — here's the 10-second version of how we fix it. If it's relevant, reply and we'll grab 20 minutes."

1.7 Territory and account planning

- 30MPC Target **lookalikes** of your wins. If one segment converts, go get more accounts like it (Luke Floyd, #187).
- 30MPC Get to power early: involve decision-makers from the start (Jason Bay).
- 30MPC Run prospecting as an **operating rhythm**: set daily expectations, put them on the calendar as invites, and get "wildly tactical" (Shay Keeler, #183).
- RAMPED Quarterly territory plan:
  1. Export your book and tier it 1/2/3 by ICP fit plus a trigger signal.
  2. Pick the top 25 Tier 1 accounts. Map 3–5 personas for each.
  3. Find your 3 best closed-won deals. Build a lookalike list of 50 from them.
  4. Block your calendar: daily dial blocks, a weekly research block, a weekly Tier 1 video block.
  5. Review the plan monthly with your manager. Promote and demote accounts based on engagement.

1.8 Prospecting do's and don'ts

Do	Don't
Research, then dial in a 60-minute block	Research between every dial
Open with context ("heard the name…" / permission)	Ask "Did I catch you at a bad time?"
Pitch the problem; give a one-line differentiator	Use buzzwords or name your product category
Treat "not interested" as a brush-off	Argue with an objection
Keep emails under 125 words with one pain each	Put calendar links in cold emails
Use interest CTAs early, specific times later	Ask for 30 minutes in the first email
Point voicemails to email	Ask for a callback
Stop selling once the meeting is booked	Keep pitching after "yes"

→ Practice drills and certification: `00-program.md` · Scorecards: `04-templates-and-scorecards.md`

Module 2 — Closing

> Goal: turn first meetings into signed deals predictably. Stages are defined by what the buyer has agreed to, not by which meetings happened. Tags: 30MPC = sourced doctrine · RAMPED **RAMPED** = our build on top of it.

2.1 The 5-Stage Sales Process (buyer agreements)

30MPC Mark Kosoglow's *"$250M ARR 5-stage sales process"* (30MPC Playbook, Sell, Jan 2025):

- Stop running stages based on meetings held. Use stages based on **agreements** the buyer has made.
- This keeps deals from stalling late.
- To apply it: *"Map these stages to your sales cycle, define clear exit criteria for each, and identify opportunities to combine calls or stages to accelerate deal velocity."*

30MPC Public listings give two versions of the stage names, so both are shown. Confirm against the gated 30MPC stage template before you finalize.

#	Version A (2025 episode description)	Version B (later summaries)
1	Problem Agreement	Problem Agreement
2	Solution Agreement	Priority Agreement
3	Power Agreement	Evaluation Agreement
4	Commercial Agreement	Value Agreement
5	Vendor Approval	Commercial Agreement

RAMPED **RAMPED stages and exit criteria.** We merged the two versions. Each stage is a CRM stage, and the exit criteria are required fields.

CRM stage	Buyer agreement	Exit criteria (all must be true)	Typical calls
S1 Problem	"We have this problem."	1. Buyer has stated the problem in their own words. 2. Impact is quantified, even roughly. 3. The 5-Minute Drill has been run.	Discovery
S2 Priority	"Fixing it matters *now*."	1. Why-now is documented (event, deadline, cost of waiting). 2. Buyer has confirmed it is a top-3 priority this half.	Discovery 2 / exec discovery

CRM stage	Buyer agreement	Exit criteria (all must be true)	Typical calls
S3 Power & Evaluation	"The people who decide agree on how we'll decide."	1. Economic buyer is identified and has been met. 2. Evaluation criteria and the evaluation steps are agreed. 3. Close plan has been shared.	Demo, technical validation
S4 Value	"This is worth the investment."	1. Business case has been co-written with the champion. 2. Economic buyer has agreed to the value.	Business case review
S5 Commercial & Vendor Approval	"Here's the price and paper."	1. Price and terms agreed. 2. Security, legal and procurement steps are dated in the close plan.	Negotiation, redlines
Closed Won	Signed	—	Kickoff

RAMPED **Combining stages to go faster.** On smaller deals, run S1 and S2 in one discovery. On deals where the champion has power, run S3 and S4 together.

2.2 Running every call

The three-chapter call

30MPC Every call has three chapters:

1. **First 5 minutes:** build credibility and set a **PPO agenda** (Purpose, Plan, Outcome).
2. **Middle:** uncover problems.
3. **Last 5 minutes:** the closing drill.

30MPC Playbook 4 ("run a sales process"):

- **Before the call:** send a shared agenda, get standard qualifying questions out of the way early, and research every attendee.
- **During the call:** state what success looks like by the end, and lock in next steps.

RAMPED PPO opener:

> "Thanks for the time. **Purpose:** understand how you're handling {area} today and whether {problem} is a priority. **Plan:** I'll ask a bunch of questions, share what we're seeing at {peers}, and if it makes sense, a quick look at how we approach it. **Outcome:** by the end we'll both know if a next step makes sense — and if not, totally fine to say so. Anything you'd add?"

The 5-Minute Drill

30MPC From episode 113 (Armand). In the last five minutes of every call, ask:

1. **"Do you want to buy?"** Do they want to solve this problem?

2. **"When do you want to buy?"** When do they need it solved?
3. **"How do you buy?"** What steps and which people does it take?

30MPC Principles on next steps:

- *"Bad: never setting next steps. Okay: setting steps on every deal.* ***Good: setting steps on REAL deals.****"*
- Suggest the **next-next steps** so the buyer agrees to a sales process, not just a free demo (Jake Dunlap, #102).
- Aim to schedule next steps on at least 70% of your opportunities (Discovery teardown).

RAMPED The drill, word for word:

> "We've got five minutes — can I be direct? Based on what you shared, is {problem} something you want to fix, or more of a nice-to-have? … When would you need it solved by, and what's driving that date? … Walk me through how something like this gets bought at {Company} — the last time you bought software like this, who was involved and what were the steps?"

30MPC Andy Whyte (MEDDICC, #87): *"Ask about the last time they bought something before asking for the buying process."*

2.3 Discovery

The Discovery Tree

30MPC's "run discovery for any product" framework. Discovery goes down three levels:

Situation → Operational problem → Executive / business impact

- 30MPC Use "typically" questions, e.g. *"Typically when we talk to {persona}s, they say X — how does that compare?"* Also use "magic moment" questions to bring high-value pain to the surface.
- 30MPC Teach reps *where the conversation is going*, not a 57-point checklist. Start with a few problem trees and refine them on live calls.

RAMPED Example tree. Fill in one per persona.

```
Situation:        How are you handling {area} today? Who owns it? What tools?
 └ Operational:   Typically {persona}s tell us {problem}. How does that show up for you?
                  How often? What happens when it does? What have you tried?
   └ Executive:   Who else feels that? What does it cost — time, $, risk, headcount?
                  If nothing changes in 12 months, what happens?
     └ Impact:    What would it mean for {exec's goal} if it were solved?
```

The 3×3 for teaching discovery

30MPC From "How to Teach Discovery Without Confusing the Hell Out of Your Sales Team" (Lead Playbook, Apr 2025):

- Three phases: **Agenda / Meat / Next Steps**.
- Each phase has three core moves.

RAMPED Our nine moves. These are RAMPED wording; the 30MPC original isn't public.

Agenda	Meat	Next Steps
1. Rapport (one human thing)	4. Situation questions	7. 5-Minute Drill
2. PPO agenda	5. Problem → impact (the tree)	8. Book the next meeting live
3. Ask what they'd add	6. "Looking for trouble" (what could stop this?)	9. Agree on the next-next step

How to ask questions (Charles Muhlbauer)

- 30MPC **Humbling disclaimer.** Ask permission before the hard question, e.g. *"I feel a bit crazy asking this, but..."*
- 30MPC **"I'd rather be more accurate than optimistic."** Say this before you test the deal.
- 30MPC **"To what extent..."** turns any yes/no question into an open one.
- 30MPC **Question roadmap:**
    1. Share context.
    2. Share an insight.
    3. Use a humbling disclaimer.
    4. Ask an open-ended question.
- 30MPC Ask **where the problem came from and what they've tried before**, not only how big it is.
- 30MPC Keep qualifying questions separate from discovery questions. Discovery should make them *think*.
- 30MPC **Look for trouble.** Ask what would stop them moving forward (#106).
- 30MPC Use a **menu of pain**: have the 3 biggest problems for each persona ready (Krysten Conner).

RAMPED Example using the roadmap:

> "Most {persona}s we work with are running {situation} *(context)*. What we're seeing is that the ones who wait until {event} end up {consequence} *(insight)*. I'd rather be accurate than optimistic, so — this might sound blunt *(disclaimer)* — **to what extent** is this actually on your plate this quarter versus something you'd like to get to?"

2.4 Demo

- 30MPC **Reset the agenda before you demo:**
    1. Tell them what you'll show.
    2. Show it.
    3. Recap and tie it back to the outcome you agreed at the start.
- 30MPC Assume your buyer will have about 60 seconds to pitch you internally (Robert Friedland, #302).

- 30MPC **Reverse demo.** The prospect shows their current workflow first, which exposes the real pain (Alex Kane, #539).
- 30MPC **Big Demo Deck.** Agree early on what they want to see and why it matters (#539, #113).
- 30MPC Lead with the outcomes they care about. Work back to details like integrations and permissions. Keep it interactive: *"What stands out to you first?"* (Cory Bray).
- 30MPC **Mixtape demo.** Don't send a 60-minute recording. Send short clips they can forward internally.
- RAMPED demo flow (45 min):

Minutes	Step
0–5	PPO; confirm the 3 problems from discovery and add anything new
5–10	Reverse demo: "Show me how you do this today"
10–30	Show 3 workflows, one per problem. After each: "How would that change things for you?"
30–35	Recap in their words; hand them the 60-second internal pitch
35–45	5-Minute Drill + close plan review + book the next-next step

---

2.5 Multithreading and getting to power

- 30MPC **Labeling statement** (Maddy Jackson, #212): *"I often hear {title} likes to weigh in — is that the same for you?"*
- 30MPC If you have leverage but haven't reached the decision-makers, **make access to power a condition** before negotiation moves forward.
- 30MPC When you ask for a senior intro, **tie it to how their involvement helps the project** (Kyle Asay, #145).
- 30MPC **Get exec intros through your champion.** Map where the real power sits and turn your champion into an advocate across the org (Christine Nolan, #537).
- 30MPC **Brief your exec** before they join a call. Have them ask about the buyer's business challenges and *"what does success look like"* (Caitlin Zylstra, #205).
- 30MPC Watch group meetings to spot the **shadow decision-maker**.
- 30MPC In a straight head-to-head against a competitor, tip the odds with **onsites, power, and references**. About half of deals are won by simply being the better seller.
- RAMPED **Stakeholder map** (template in `04`). Every deal above $X needs at least 3 contacts engaged before S3, including the economic buyer.

RAMPED Ask for power through your champion:

> "To make sure we're not wasting your time — on deals like this, {CFO/CISO} usually wants a say on {their concern}. Rather than you carrying that, would it make sense for me to get 20 minutes with them so you're not stuck answering questions you shouldn't have to? I'll prep you on exactly what I'd cover."

2.6 Building champions

- 30MPC *"Just because someone is taking a first meeting with us, that doesn't make them automatically a champion"* (Krysten Conner).
- 30MPC *"Don't sell to your champion. Sell THROUGH them"* (#554).
- 30MPC Tie the champion's personal win to the business case (Joe McNeill, #227).
- 30MPC **Screenshot references.** Line up references by checking in with past customers *before* you urgently need them (Krysten Conner, #543).
- RAMPED **Champion test.** A champion does all three:

  1. Has power or influence.
  2. Personally wins if this deal happens.
  3. Has taken an action for you, e.g. an intro, sharing internal info, or setting a meeting.

  If they haven't, they're a coach, not a champion.

2.7 The business case

- 30MPC Nate Nasralla (Fluint, #117): build the business case in **"Mad Lib style."** Start from a framework and fill in the blanks *during the call*.
- 30MPC A one-page business case answers three things:

  1. The problem.
  2. The cost of inaction.
  3. Why now.

  Write it in the **buyer's language**. Your champion should feel they wrote it, because they'll defend it in rooms you're never in.
- RAMPED Template: `04 → Business case`.

2.8 The close plan (mutual action plan)

- 30MPC **Customer-facing close plan** that covers the key gates: **power, security, legal**. Review it **live on every call**; don't email it once and forget it (Jeremey Donovan, #111).
- 30MPC Map the key milestones and customize them for each prospect (Ross Rich, #116).
- 30MPC Use the MAP to hold the prospect accountable, and be direct (Tom Hemmingsen, #92).
- RAMPED Template: `04 → Close plan`. Work backwards from the buyer's go-live date.

2.9 Negotiation and pricing

30MPC Negotiation Playbooks (Playbook 3, Playbook 13/14, Hall of Fame #581):

Before you negotiate

1. Know **your needs and wants** and **their needs and wants**.
2. **Lock in access to power.** Confirm the person you're negotiating with can get the deal done on time.
3. Confirm **you're the vendor of choice**. Then lock the **timeline**. Only then trade.
4. Set expectations up front, e.g. *"we don't do end-of-month discounts,"* before you need to. Agree in the upfront contract that pricing comes **after discovery**.

When you give price 5. *"Explain how price is structured BEFORE you give it, then shut up."* 6. Tell them in the agenda that you'll share price before the call ends (Belal Batrawy). 7. Set up pricing options around **what they want**, not around your units such as seats. 8. **Decoy pricing:** three options, e.g. $6 (undesirable) / $7.50 (acceptable) / $8 (just what they need). 9. Don't hide the price or wait to give a range; delaying it kills trust (Todd Caponi, "7 Deadly Sins").

When they push 10. **Flinch and trade.** Act surprised at a discount request, and **never concede without a give-for-get**. 11. Package **price, terms, and conditions together** so the buyer weighs real trade-offs instead of a stream of separate asks. 12. **Caponi's four levers:** - Volume - Timing of cash - Length of commitment - Timing of the deal

```
Share them *early* so your champion can defend the trades internally.
```

13. Get a firm commitment on timing **before** any discount. If the deal slips, pricing goes back to standard (Will Padilla, #129).
14. Know when competitors' fiscal periods end, so you can predict when they'll drop price (Johnny Larson).

RAMPED Discount request talk track:

> "Hm — that's a big ask *(pause)*. I want to get this done for you, so let's look at what we can trade. If we can get signature by {date}, a {2-year} term, and annual upfront, I can take that to my team. If the date slips, we go back to standard pricing. Which of those can you do?"

2.10 Forecast hygiene and deal qualification

- 30MPC Point it out when a deal no longer looks like a top priority. Bring in your execs when you're dealing with theirs. Show your research early (Andy Whyte, #87).
- 30MPC Test deals against **binary yes/no criteria** (Lightning Pipeline Review, Module 3).
- RAMPED Use these forecast categories, defined by stage exit criteria rather than gut feel:

Category	Rule
Commit	S5 reached; close plan dated through signature; economic buyer has agreed value; no unresolved red flags
Best case	S4 reached; business case in progress; power met
Pipeline	S1–S3

Category	Rule
Omit	No next step on the calendar, or buyer stopped responding for 14+ days

---

2.11 Closing do's and don'ts

Do	Don't
Define stages by buyer agreements	Count meetings as progress
Run the 5-Minute Drill on every call	End a call without a dated next step
Book next-next steps	Give a free 60-minute demo with no process
Get to power before negotiating	Negotiate with someone who can't sign
Co-write the business case	Send a generic ROI calculator
Review the close plan live	Email the MAP once and forget it
Explain price structure, give price, stop talking	Fill the silence after stating price
Flinch, then give-for-get	Discount without a commitment

Module 3 — Leadership

> Goal: hire, ramp, and coach a team that hits President's Club every year. Tags: 30MPC = sourced doctrine · RAMPED **RAMPED** = our build on top of it.

3.1 Team design

- 30MPC Your first sales hires should be **builders** who create the process. Later hires **follow** that process (Ep. 283, "How to Build the Perfect Sales Team, Role by Role").
- 30MPC Give each manager about **8 reps**. Stretch to 10–12 only if you have to.
- 30MPC **Don't hire a director until you have at least 3 managers.**
- 30MPC Look to retain and promote your own people before hiring from outside. A clear SDR → AE path keeps your best people.

3.2 Hiring

Bar

- 30MPC Hire only on an **enthusiastic yes**. Never settle for average ("8 Lessons That Separate Good Sales Leaders from Elite Ones").
- 30MPC **Each interview stage should test a different selling skill**, and the person running that stage should be strong at that skill (Lead Playbook Part 2).

The 4-step AE interview process

30MPC The four steps, from "Sales Hiring Secrets No One Talks About":

1. Recruiter screen
2. Hiring manager interview
3. Interview loop: one-on-one interviews plus a culture panel
4. A **"talk them out of it"** interview

30MPC These feed a scoring system built so that only strong candidates get through.

RAMPED **What each stage tests and who runs it**

Stage	Owner	Tests	Exercise
1. Recruiter screen (30 min)	Recruiter	Motivation, track record, logistics	Walk me through your stack rank and quota attainment, year by year
2. Hiring manager (45 min)	Hiring manager	Deal craft, self-awareness, coachability	Deal story: your biggest win and your worst loss, step by step

Stage	Owner	Tests	Exercise
3a. Mock cold call (20 min)	Top SDR/AE	Prospecting under pressure	Cold call a role-player → get feedback → **call again**
3b. Mock discovery (30 min)	Senior AE	Discovery tree, 5-Minute Drill	Discovery with a role-played buyer → feedback → **run it again**
3c. Culture panel (30 min)	2–3 peers, including the **future onboarding buddy**	Team fit, how they work	"How You Work" questions
4. "Talk them out of it" (30 min)	Leader (VP/CRO)	Conviction, real fit	Lay out the hardest truths about the role; check they still want it with eyes open

- 30MPC **Coachability test.** Double back on the mock: *"your most coachable reps will nail the 2nd try"* (Sean Gentry, #190). 30MPC also uses a mock cold-call filter to test coachability and how candidates perform under pressure.
- 30MPC **Put the new hire's onboarding buddy on the interview panel** (John Sherer, #264).
- RAMPED Scoring: each stage is scored 1–4 (1 = strong no, 4 = strong yes). Any 1 or 2 means no hire. The scorecard is in `04`.

Outbound recruiting top 1% reps

30MPC From Ep. 251, "Outbound Recruiting to Find the Best Sales Talent" (Armand):

- **Sell before you screen.** Don't grill outbound candidates. Ask them to brag about what sets them apart, and judge quality from that.
- **Mini-pitch framework** for the role:
  1. Your personal story
  2. Your team's philosophy
  3. What impressed you about *them*
- **Backchannel** through mutual connections. Connect with everyone at your company on LinkedIn so you have the paths.

RAMPED Recruiting message:

> "{First} — saw you {specific achievement: #1 at X / promoted twice in 18 months}. I'm {Me}, I run sales at RAMPED. I {one-line personal story}; we run the team on {philosophy, e.g. 'coaching every week, not every quarter'}. Not sure you're looking, but I'd love 20 minutes to hear what you're proudest of. Open to it?"

For candidates (and for your SDRs who want to get promoted)

30MPC Playbook 9, "How to Land a Killer Sales Job":

- Build a **target list of 25 companies** that meet your criteria.
- Write a **résumé with specific numbers**.
- Come into the interview with a **point of view**.
- Cold call the hiring manager, and run the process like a sales cycle.

30MPC Run your promotion like a deal. Map the stakeholders and how the decision gets made, and raise the objections before your manager does (Sarah Brazier, #60).

3.3 Onboarding

Principles

- 30MPC *"Win the first 30 days or lose the next 300"* (Jonah Mandel, #305).
- 30MPC Spend the **first ~6 weeks on heavy immersion**, then move to learning on the job (Lead Playbook, "How to Train Your Team").
- 30MPC Use **Mark's assessment matrix** to decide how much training time a skill gets:
  - How hard is it to learn (cognitive load)?
  - How proficient does the rep need to be?
- 30MPC Give new reps low-stakes **"training leads"** before they handle high-value inbound.
- 30MPC Give every new hire a **personal success blueprint** and a **"road to President's Club"** routine (Marcus Chan, #331).
- 30MPC 's 4-week program balances **industry, product, and sales execution** training. It uses simulated mock calls and **SMB discovery loops**.
- 30MPC Marcus Chan's 12-week ramp:

Weeks	Focus
1	Foundations and role plays
2	Live calls
3	First discoveries; shadow a top AE
4	"Showcase week"
5–12	Full immersion and certification

RAMPED The full RAMPED day-by-day plan is in `00-program.md`.

Mark's assessment matrix applied

RAMPED

	Low proficiency needed	High proficiency needed
Low cognitive load	Self-serve: docs, Loom (CRM hygiene, tools)	Drill until it's automatic (cold call opener, PPO agenda, 5-Minute Drill)
High cognitive load	Awareness only (deep technical/product internals)	Most instructor time: role plays and certification (discovery tree, objection handling, negotiation)

3.4 Coaching

Call coaching

- 30MPC **Prep 30 minutes before each 1:1** to decide what you'll coach (Sean Gentry, #190).
- 30MPC **Start with the metrics.** Use them to decide which parts of which calls to listen to. That's how you get through 10 calls in a 30-minute session.
- 30MPC Prep reps on two things for each call: **what they want out of it, and how they plan to get it**. Pay attention to the **first 7 "golden" minutes**, where discovery is won.
- 30MPC **Role play every critical conversation**, even if it's minutes before the call (Mark Nietzel, #309).

RAMPED **Diagnosing from metrics**

Metric is low	Listen to	Likely fix
Connect → conversation	First 10 seconds	Opener, tone
Conversation → meeting	Pitch and objections	Problem proposition, Miyagi
Meeting held → S2	Minutes 0–7 and the last 5	PPO agenda, discovery depth, 5-Minute Drill
S3 → S4	Demo recap, stakeholder map	Power and champion
Win rate / discount	Negotiation calls	Give-for-get, price delivery

The 1:1

30MPC SDR 1:1 agenda (from a 30MPC Lead episode):

1. The rep's agenda first
2. Pipeline review of the accounts they plan to book
3. One good call and one bad call
4. Career goals

30MPC Use the **"How You Work"** questions to understand the person behind the seller (Shay Keeler, #183).

RAMPED weekly 1:1 (30 min):

Minutes	Topic
0–5	Rep's topics
5–12	Numbers vs. plan (activity → meetings → pipeline → bookings)
12–25	Coaching on **one skill**, using 2–3 call clips the manager picked before the meeting, plus a 3-minute role play
25–30	One commitment for the week. Career goal check-in (monthly)

Deal reviews

- 30MPC Review deals **as a team** to spot blind spots.

- RAMPED Use the Deal Review template in `04`. Ask the questions, don't tell. "Who's the economic buyer, and when did you last talk to them?" beats "you need to multithread."

3.5 Pipeline reviews and forecasting

- 30MPC **Lightning pipeline review** (Mark Nietzel, #309): test each deal against key criteria with **binary yes/no answers**.
- 30MPC Require **weekly pipeline trackers**, where *"reps forecast and explain exactly how they'll build and progress pipe."*
- 30MPC **SDR pipeline-generation forecasting** (Maya Connet, #208):
  - Marketing, SDRs, and account directors each have a top-of-funnel quota, rolled up bottom-up.
  - Forecast early in the quarter = meetings booked over the last 2 quarters × conversion rate.
  - Get half of the quarter's meetings booked early.
  - Measure SDRs on **qualified opportunities, not meetings**.

RAMPED **Lightning review questions.** Answer yes or no only. Any "no" becomes an action item.

1. Has the buyer stated the problem in their own words? (S1)
2. Is there a dated why-now? (S2)
3. Have we met the economic buyer? (S3)
4. Is there a champion who passes the 3-part test?
5. Is the close plan shared and dated through signature?
6. Is the next meeting on the calendar?
7. Do we know the paper process: security, legal, procurement?
8. Have we had live contact in the last 14 days?

3.6 Operating rhythms

- 30MPC To get a team prospecting: *"set daily expectations, put them in calendar invites in an operating rhythm, then get wildly tactical on how to do it"* (Shay Keeler, #183).
- 30MPC recommends 4 weekly team rhythms to keep veteran reps sharp. The episode doesn't name them, so the 4 below are ours.
- 30MPC Build dashboards a manager can read at a glance, telling a story rather than a spreadsheet. Run an emotional pulse check about every 6 weeks (Jonah Mandel, #305).

RAMPED **RAMPED operating cadence**

Rhythm	When	Length	What
Power hour (team call blitz)	Daily	60 min	Team dials together; shout-outs in Slack
Forecast and pipeline call	Monday	45 min	Lightning review, commit/best case
Skill lab (weekly rhythm #1)	Tuesday	45 min	One skill; live role plays in pairs
Game film (weekly rhythm #2)	Wednesday	30 min	Team breaks down one recorded call
Deal clinic (weekly rhythm #3)	Thursday	45 min	2 deals reviewed by the team

Rhythm	When	Length	What
Wins and losses (weekly rhythm #4)	Friday	20 min	One win and one loss: what we learned
1:1s	Weekly	30 min	See above
Pulse check	Every 6 weeks	15 min	Engagement and morale, one on one
QBR and territory plan	Quarterly	2 hrs	Plan vs. actual; next quarter's territory plan

---

3.7 Leader do's and don'ts

Do	Don't
Hire on an enthusiastic yes	Hire "good enough" to fill a seat
Test coachability with a second try	Judge only the first attempt
Sell before you screen in outbound recruiting	Grill passive candidates
Win the first 30 days	Hand a new rep high-value inbound on day 3
Coach one skill at a time, chosen from the metrics	Listen to whole calls at random
Run binary pipeline reviews	Ask "how do you feel about this deal?"
Put rhythms on the calendar	Rely on reps to self-organize prospecting
Keep about 8 reps per manager	Stretch a manager past 10–12 reps

Module 4 — Templates & Scorecards

All templates here are RAMPED builds on top of 30MPC frameworks (see each module for the source principles). Copy them into Docs/Sheets/CRM as needed.

Messaging Matrix

30MPC Jason Bay's Messaging Matrix: Priorities → Current solutions → Problems → Aspirations. Fill in one per persona.

Field	Persona: _____
Priorities: what they're measured on this year	
Current solutions: how they handle it today (tools, people, spreadsheets)	
Problem 1: in their words, vivid	
Problem 2	
Problem 3	
Aspirations: what "great" looks like for them	
Peers / logos to name-drop	
One-sentence differentiator	
Problem proposition (cold call pitch)	
Top 3 likely objections + Miyagi responses	
Discovery tree: situation → operational → executive → impact questions	

Call block prep sheet

#	Name	Title	Persona	Hook (1 line)	Peers to mention	Lead problem	Outcome
1							Connect / VM / No answer / Meeting

Stakeholder map

Name	Title	Role (Economic buyer / Champion / Coach / Technical / Legal / Procurement / Blocker)	Power (H/M/L)	Stance (+/0/−)	What they personally win	Last contact	Next action

RAMPED Champion test, all three must be "yes":

- [ ] Has power or influence
- [ ] Personally wins if this happens
- [ ] Has taken an action for us (intro, inside info, set a meeting)

One-page business case

30MPC Nate Nasralla's approach: write it "Mad Lib" style, live with the champion, in the buyer's language. It answers three things: problem, cost of inaction, and why now.

```
BUSINESS CASE — {Company} × RAMPED                          Owner: {Champion}

1. THE PROBLEM (in our words)
   Today, {team} {situation}. This causes {operational problem}, which means {executive
impact}.

2. COST OF INACTION
   If nothing changes in the next {12} months: {$ / hours / risk / missed goal}.
   How we calculated it: {simple math the CFO can check}.

3. WHY NOW
   {Event / deadline / initiative} on {date} requires this to be solved by {date}.

4. WHAT WE'RE DOING ABOUT IT
   Approach: {1–2 sentences}.  Alternatives considered: {status quo / build / vendor X}.

5. SUCCESS METRICS (90 days / 12 months)
   - {Metric 1}: from {X} to {Y}
   - {Metric 2}: from {X} to {Y}

6. INVESTMENT
   {Price, term}. Payback: {months}.

7. PLAN & OWNERS
   See close plan. Executive sponsor: {name}.
```

Close plan / mutual action plan

30MPC This plan is shared with the customer. It covers the gates for power, security and legal, and you walk through it **live on every call** (Jeremey Donovan, Ross Rich). RAMPED Build it backwards from the go-live date.

Goal: {Company} is live on RAMPED by **{go-live date}** to hit {why-now event}.

#	Milestone	Stage	Buyer owner	RAMPED owner	Target date	Status
1	Problem and priorities confirmed	S1–S2	Champion	AE		✓
2	Evaluation criteria agreed	S3	Champion	AE		

#	Milestone	Stage	Buyer owner	RAMPED owner	Target date	Status
3	Demo / technical validation	S3	Tech lead	SE		
4	Economic buyer meeting	S3	Econ. buyer	AE + RAMPED exec		
5	Business case approved	S4	Champion → EB	AE		
6	Security review complete	S5	Security	SE		
7	Commercial terms agreed	S5	EB / Procurement	AE		
8	Legal / redlines complete	S5	Legal	RAMPED legal		
9	Vendor onboarding / PO	S5	Procurement	AE		
10	Signature	Won	Signer	AE		
11	Kickoff	—	Champion	CS		

Deal review

Question	Answer
Stage, and which exit criteria are met (evidence for each)	
Problem in the **buyer's words** (quote)	
Why now, and the date	
Economic buyer: name, and last conversation	
Champion: does the person pass the 3-part test?	
Competition / alternative (including status quo)	
Business case status	
Close plan: next 3 milestones and their dates	
Paper process (security / legal / procurement)	
Biggest risk, and what we're doing about it this week	
What would make this deal slip? ("look for trouble")	

Lightning pipeline review (weekly)

Answer yes or no only. Every "no" needs an owner and a date.

Deal	Problem stated	Dated why-now	EB met	Champion	Close plan dated	Next mtg booked	Paper process known	Contact ≤14d	Forecast

Weekly pipeline tracker (rep-written)

30MPC *"Reps forecast and explain exactly how they'll build and progress pipe"* (Mark Nietzel, #309).

```
Week of: ____
Commit this quarter: $____   Best case: $____   Pipeline created this week: $____
Deals advancing this week (deal → from stage → to stage → how):
New pipe plan (accounts / sequences / events):
Where I need help:
```

Scorecards (1 = miss · 2 = partial · 3 = solid · 4 = elite)

Cold call certification rubric (C2)

Line	1	4	Score
Opener	Uses "bad time?" or a generic line	Uses context, owns the cold call, and the delivery lands	
Tone	Rushed or apologetic	Calm and warm, with a pattern interrupt	
Problem proposition	Pitches features or a product category	Vivid problem in the buyer's words, then a one-line differentiator	
Objection: acknowledge	Argues or ignores it	Pauses, then validates genuinely	
Objection: clarify	Skips this step	Brings out the real objection	
Wax back	Re-pitches the same thing	Tailors the pitch to what they said	
Close	No ask, or a vague one	Assumptive, with specific times or a placeholder invite	
Coachability (second attempt)	No change	Applies the feedback right away	

Discovery certification rubric (C3)

Line	1	4	Score
PPO agenda	No agenda	Purpose, plan and outcome are stated and the buyer adds to them	
Situation	Interrogates	Brief, uses "typically", shows research	
Operational problem	Stays on the surface	Gets to frequency, consequences, what they've tried	
Executive impact	Not reached	Quantified, and tied to an exec's goal	
Question craft	Closed questions	Uses humbling disclaimers and "to what extent..."	
Looking for trouble	Avoids risk	Asks proactively what could stop the deal	
5-Minute Drill	Skipped	Covers want, when and how; asks about the last purchase	
Next steps	"I'll follow up"	Next meeting booked live, and next-next step agreed	

AE interview scorecard

Stage	Tests	1 Strong no · 2 No · 3 Yes · 4 Strong yes	Evidence
Recruiter screen	Motivation, track record		
Hiring manager	Deal craft, self-awareness		
Mock cold call (1st → 2nd)	Prospecting under pressure + coachability		
Mock discovery (1st → 2nd)	Discovery + coachability		
Culture panel	How they work, team fit		
"Talk them out of it"	Conviction, fit with eyes open		

Decision rule: hire only on an **enthusiastic yes**. Any 1 or 2 means no hire.

Negotiation certification rubric (C6)

Line	1	4	Score
Power confirmed before trading	No	Confirms the person can sign by the date	
Vendor of choice + timeline locked first	No	Both confirmed before any trade	
Price delivery	Rambles or justifies	Explains structure, states the price, then silence	
Flinch	Concedes immediately	Shows genuine surprise and holds	
Give-for-get	Free discount	Every concession is traded for a lever (volume, cash timing, term, deal timing)	
Slip clause	None	"If the date slips, pricing returns to standard"	

Sources & Open Gaps

Every 30MPC item in this manual comes from the public sources below: 30MPC episode show notes, listings, and partner guides. Short quotes are wording from the show notes. They have not been checked against the audio.
